

It's 7AM.

THESE PEOPLE NEED TO BE IN HOT WATER...You DON'T!

Whatever the application, multi-unit residential, restaurant, laundry, hotel/motel, or institutional, there's always plenty of hot water available with Teledyne Laars volume water heaters.

Multiple designs suit the specific application. With 21 sizes from 125,000 to 5,000,000 BTU/hr., indoors or outdoors, the

MIGHTY THERM is compact enough for the most tightly designed mechanical room.

The **MIGHTY MAX** minimizes operating costs with its 85% energy efficiency. The 29" x 21" footprint is exceptional; sizes to 775,000 BTU/hr.

The **HI-E** sets the standard in efficiency and reliability. At 90% energy efficiency and 320,000 BTU/hr., it's THE answer to high operating costs.

Replace a tank-type water heater with the new **MIGHTY-STACK**. With a 199,000 BTU/hr. water heater atop an 80 gallon tank, fast recovery is a given. Tight spaces are no problem either, with Mighty-Stack's 29" x 32" footprint.

Rely on Teledyne Laars for the answer to volume water heater needs. We know how to keep your customers in hot water.... and you out of it!.....**Innovation in Action.**
