

Model X1D3

**TRILIGHT**

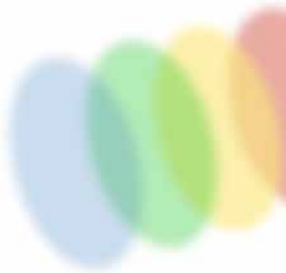

**3 COLOR**

Indicator Lights

The Model X1D3 TRILIGHT 3 Color Indicator Lights combine craftsmanship with convenience to be quickly and easily applied to your specific needs, such as production testing, process instrumentation, control panels, alarm indicators, graphic displays, etc.

The TRILIGHT is small in size, measuring only  $2\frac{7}{8}$  inches long and 1 inch in diameter. The lens is engravable acrylic with excellent side vision of up to  $180^\circ$ . Lamps are available in a choice of three of the five standard colors (for each lamp). The TRILIGHT is completely enclosed (dust-proof), keyed for proper orientation, and may be mounted on  $1\frac{1}{8}$  inch centers. The terminals accept soldered, taper pin, or screw connections.

No tools are required for the easy front-of-panel replacement of lamps. Each lamp may be wired individually, thus eliminating the use of common connections.
